

# The Top 7 Ways to Reduce Print Costs

We love helping leaders like you save time and money. As experts in Managed Print for over 30 years, we've identified the Top 7 Ways to Reduce Print Costs.

- 1 Gain Visibility on Your Print Spend**

Most organizations are in the dark about determining their true print spend. A comprehensive print assessment by a trusted Managed Print Partner can provide visibility of costs and a plan to cut print costs an average of 20% by reducing the number of printers in your environment, offering supply discounts and taking care of device service needs.
- 2 Optimize Your Device Strategy**

It can be confusing to determine which devices will best meet your cost and efficiency needs, and many organizations either have too many devices, the wrong devices, or both. A top-notch Managed Print Partner can help you create an optimal device strategy to save time and money on equipment, servicing and supplies.
- 3 Print Less**

Are your recycle bins overflowing with paper? A cost-cutting software solution like Papercut® can help you reduce print waste, educate users about black and white vs. color costs, encourage mindful print decisions, monitor print usage by user, save trees and more.
- 4 Free Up Your IT Team's Time**

Partner with a trusted Managed Print Services provider to take device-related service needs and frustrations off your plate, reducing IT help desk tickets an average of 51%.
- 5 Reduce Paper and Increase Efficiency**

Document automation software solutions like Laserfiche® can help you make document workflow more efficient and cost effective. Say goodbye to file cabinets with digital document storage, reduce or even eliminate paper by automating processes, and lower overhead.
- 6 Implement a Pull-Print Solution**

Pull-print solutions like Papercut® require your team to swipe a badge or enter a code on the device to release print jobs. This feature enables you to cancel print jobs with errors before they print, cut costs, protect confidential documents, and meet compliance requirements.
- 7 Eliminate Toner Inventory**

There's no need to stock up on costly toner supplies. Save hundreds to thousands of dollars with an automatic toner monitoring and supply replenishment service.

imageOne makes these cost-cutting steps simple and easy.
